◈ Glossary

MINERA (MNRQV)

Assurance Ledger

A daily digital record confirming all project actions, updates, and acknowledgments. Ensures accountability and regulator-grade transparency.

Compliance Dashboard

An AI-driven interface displaying real-time compliance metrics, ESG data, and audit trails for regulators and investors.

Daily Acknowledgment

Routine digital confirmation by team members that protocols, updates, and compliance standards have been followed.

ESG (Environmental, Social, Governance)

Framework ensuring MINERA's mineral recovery projects align with sustainability, community engagement, and ethical governance standards.

Investor Portal

The unified online hub where investors access sub-reports, dashboards, allocation disclosures, and governance tools.

Living Compliance Log

An evolving record of IT updates, developer actions, and project changes. Designed to be immutable, auditable, and regulator-safe.

MNRQV Token

MINERA's compliance-grade utility token. Provides access to dashboards, enables governance participation, and anchors transparency in the ecosystem.

Regional Sub-Reports

Detailed investor-facing documents covering mineral recovery potential in Cornwall, Wales, and the Midlands.

Regulator Dashboard

Portal view tailored for regulators, providing compliance logs, ESG metrics, allocation records, and governance updates.

Role Matrix

A structured accountability map defining stakeholder responsibilities, escalation chains, and decision-making authority.

Token Utility

The functional purpose of MNRQV: access, governance, transparency, and alignment with mineral recovery projects.
