

## ◆ Regulator FAQ

### MINERA (MNRQV)

#### 1. What is MINERA's regulatory approach?

MINERA is built on **compliance-grade protocols**, embedding daily assurance ledgers, living compliance logs, and regulator-grade dashboards into all operations.

#### 2. How will MINERA ensure transparency?

- Unified investor portal with clear allocation disclosures.
- Continuous publication of regional sub-reports (Cornwall, Wales, Midlands).
- Immutable compliance records accessible for audit and review.

#### 3. How are risks managed?

- **Market Volatility:** Mitigated by intrinsic token utility in dashboards and ESG reporting.
- **Regulatory Shifts:** Addressed through adaptive compliance logs and regulator-grade documentation.
- **Technical Risks:** Controlled via AI-first build, QA, and audit trails.
- **ESG Concerns:** Balanced with transparent reporting and community engagement.

#### 4. How is token allocation handled?

Allocation between founder, developers, employees, and stakeholders is **pre-defined, disclosed, and logged**. All transactions are auditable through blockchain records and compliance dashboards.

#### 5. What governance mechanisms are in place?

- Stakeholder voting via MNRQV token.
- Role matrices and accountability trackers embedded into daily workflows.
- Escalation chains and crisis protocols finalized for operational resilience.

#### 6. How does MINERA protect stakeholders?

- **Anonymity protocols** safeguard founders, developers, and investors.
- **Legal disclaimers** and risk statements embedded in portal documentation.
- **Audit trails** ensure every update is traceable and regulator-safe.

#### 7. How are ESG standards integrated?

- Transparent reporting on environmental and community impact.

- Alignment with sustainability principles in mineral recovery projects.
- Continuous publication of ESG metrics via compliance dashboards.

#### **8. How can regulators access information?**

Through the **Regulator Dashboard** within the portal, which provides:

- Compliance logs and assurance ledgers.
- ESG metrics and sub-reports.
- Allocation records and governance updates.
